

Pokemon FireRed and LeafGreen Berry Uses and Locations

List of all berries with their uses and locations in Pokemon FireRed and LeafGreen versions. There is no "bonus" for obtaining all of these berries and this checklist should be considered an optional post-game objective.

It is not possible to grow more berries in FireRed and LeafGreen Versions as there is no in-game clock. Berries found in the Berry Forest will regenerate occasionally.

Only obtainable berries in FireRed and LeafGreen Versions are included in this checklist. Other berries are available in Ruby, Sapphire, Emerald, Colosseum, and XD: Gale of Darkness. These berries may be traded into FireRed and LeafGreen but most berries serve no purpose.

The Itemfinder Key Item is a requirement to complete this checklist. It is received from Professor Oak's Aide on the upper floor of the Guardhouse at the eastern end of Route 11 where it connects to Route 12 after having registered 30 different Pokemon in the Pokedex. Berries requiring the Itemfinder are marked with a "(hidden)" in the location description and are usually on a "marked" square unless specified.

- Cheri Berry - Cures paralysis - Route 10: north side, northwest of Picnicker Heidi (hidden) | SS Anne Kitchen: in the middle trash can (hidden) | Sevault Canyon: south of the Chansey Dance house (hidden) | Berry Forest: north of the middle body of water (hidden) | 10% chance of receiving from a Pokemon with the Pickup ability
